

Urine Cell-Free DNA Isolation Kit

Highly efficient bead-based extraction and purification of cell-free DNA from urine

Higher yield of urine circulating fetal DNA in JBS kit compared to Kit Q

- Specialized magnetic bead coating
- High-performance buffer formulations
- High-quality DNA ready for qPCR/NGS
- Compatible with JPurX-S200 automation instrument

(A) Representative size profiles of PG urine cell-free DNA isolated using JBS and Q kits from 0.2mL urine equivalent. (B) Y-Chromosome yield from PG urine donors. PG, pregnant female donor carrying a male fetus. (Lin *et al.*, *Diagnostics* 2021, 11, 650)

- Flexible sample input volume
- Exceptional reproducibility
- Clog-free

JPurX-S200 Nucleic Acid Extraction System

Standalone automated system with LCD graphic interface

ORDERING INFORMATION

For inquiries and ordering, please contact us by email info@jbs-science.com! New kit items will be updated at jbs-science.com/products

Catalog#	Product Name	Price (Quantity)
JBS-08872-MA	JBS Urine Cell-Free DNA Isolation Kit (10mL)	\$384 (48 isolations)
JBS-08872	JBS Urine Cell-Free DNA Automated Isolation Kit (10mL)	\$408 (48 isolations)
